

IRONMAN 4X4 VEHICLE PROTECTION UNDER BODY PROTECTION

Ironman 4x4

Product Concept, Design, Development, Testing & Evaluation

For more than 60 years, Ironman 4x4 has been and continues to be a leader in 4x4 accessory design and innovation. We develop and manufacture products primarily focussed on people and businesses who use their vehicles for work, recreation or fleet applications.

Our products are exported to more than 160 countries and have become the choice of 4x4 owners throughout the world, including many of the world's largest defence forces.

All Ironman 4x4 product evolves from concept through CAD desing, to development, testing and evaluation. Our products are rigorously tested in the harshest conditions on earth... The Australian Outback!

This guarantees that Ironman 4x4 accessories fitted to your new Jeep are of the highest quality, having been thoroughly tested, ensuring that you get there and back safely.

All of the above makes us live up to our company vision of delivering quality products that are **Safer, Stronger, Smarter.**

Under Body Protection

The Ironman 4x4 Premium Underbody kit is designed to protect, giving you peace of mind on and off-road.

Durable Material

Designed and fabricated using heavy-duty 4mm steel, offering superior damage, impact and penetration resistance.

Surface and Corrosion Protection

The underbody protection has been EDP E-coated and finished in textured black powder coating.

Ultimate Strength

The premium underbody protection provides superior strength and protection far exceeding the OEM equipment, with recessed high tensile hardware removing catch points and adding greater coverage.

The design offers strength and protection in the most common strike zones, reducing plate deformation and deflecting force into load-bearing elements.

Applications available for most late model 4wd vehicles. Check our vehicle listing for availability.
